

In the Specification:

(Referring to the Substitute Specification
filed on November 25, 2003)

Please **replace** the paragraph at **page 6, line 24 to page 7, line 12**, with a replacement paragraph amended as follows:

According to the exemplary embodiments illustrated in ~~[[figs]]~~ figs. 1 and 2, a fastening edge 8 having a slightly larger diameter and having fastening holes ~~[[9]]~~ distributed in the circumferential direction is situated on the head element 3. The housing part 5 is pushed with its open end under the fastening edge 8 of the head element 3 until it makes contact. In the fitted position, the head element 3 and the housing part 5 are connected fixedly to each other. For this purpose, fastening means 10 which extend through the fastening holes ~~[[9]]~~ are provided. Screw bolts or else rivets are suitable as fastening means 10.
